

Reuben Gobezie MD

**Founder & Director, Cleveland Shoulder Institute,
GO Ortho, Regen Orthopedics**

Orthopedic Surgeon, Reuben Gobezie, MD, is an internationally recognized leader in the care of shoulder and sports injuries. A graduate of Harvard Medical School, Dr. Gobezie was named one of the top 25 shoulder specialists in the US as ranked by leaders in the field. He was also voted one of America's top doctors by his patients. For six consecutive years, he has received the Patient's Choice Award, an honor bestowed on less than one percent of physicians nationally, and the result of patient ratings of their medical care. Additionally, Dr. Gobezie is consistently recognized on the Top Doctors list nationally by Castle Connolly and locally as one of Cleveland Magazine's best doctors.

He has treated many athletes from universities and high schools throughout Ohio, and was formerly a team physician for the Cleveland Gladiators. Dr. Gobezie previously served as an NFL consulting physician for the Cleveland Browns and as head team physician for Gilmour Academy.

Dr. Gobezie is Board Certified by the American Board of Orthopaedic Surgery. He completed his undergraduate studies at The Johns Hopkins University prior to graduating from Harvard Medical School. His orthopedic residency was done at the Harvard Combined Orthopaedic Residency Program. Dr. Gobezie obtained sub-specialty training in shoulder and elbow surgery by completing the Harvard Shoulder Fellowship.

Dr. Gobezie has made pioneering contributions to the areas of shoulder replacement surgery, cartilage transplantation and biceps surgery. He is able to offer his patients techniques and treatment paradigms that are at the forefront of shoulder and elbow surgery. His practice specializes in minimally invasive and innovative approaches to the treatment of arthritis, rotator cuff tears, instability and other more rare shoulder disorders.

Dr. Gobezie is actively involved in significant clinical research and employs the most current arthroscopic and open surgical

techniques to manage shoulder and elbow disorders.

Dr. Gobezie's research has been recognized with numerous national awards including the prestigious Neer Award from American Shoulder & Elbow Surgeons, Zimmer/Orthopaedic Research and Educational Foundation Award, the Pfizer Innovative Scientific Centers for Orthopaedic and Pain Management Excellence Research Award, the Arthroscopy Association of North America's Research Grant and the Massachusetts General Hospital Physician Scientist Award.

He served as Co-Director of the Musculoskeletal Proteomics Research Group at Harvard and continues his studies in osteoarthritis and related musculoskeletal disorders. In addition, his clinical research has been presented at numerous national and international meetings and he is an invited lecturer both in Europe and many parts of the United States.

Dr. Gobezie was the first University Hospitals physician to be elected a member of the American Shoulder & Elbow Surgeons, the most prestigious sub-specialty group in orthopedic surgery comprised of just over 200 of the top shoulder surgeons from around the world.
